Summary and Certificate
Derived from our "life energy tests"

1. Three operational fields of the energized "Amezcua Chi Pendant 2" (Verum) compared with a Placebo were tested: the effects on the net of the meridians ('Chi' energy and harmony), on the soma (organ functions and colloidal states), and on the vegetative nervous system (Heart Rate Variability to describe stress and the sympathetic and vagal nervous systems). The tests were performed as randomized, placebo-controlled, and blinded test procedures.

2. The energized "Chi Pendant 2" is able to improve energy, harmony, organ functions, and to balance the human autonomous systems suffering from stress. Concerning the comparison with a Placebo and control measurements the differences are significant.

Certificate

The Amezcua Chi Pendant has been evaluated and certified to biologically protect against electro-smog and to produce an increase and balance in the levels of energy and harmony in humans.
It has a positive direct building up consequence on the bio-energetic state of humans.
