CON200931224-001 12 Oct 2009

Radioactivity Report

Items Analysed	I)	Product Name	:	Veloci-Ti – Concord Pendant
		Description	:	Gray & black PVD-plated brushed titanium, 18K gold inlay, 35mm diameter
	II)	Product Name	:	Amezcua Chi Pendant
		Description	:	High-temperature clear glass, 38mm diameter, 5mm thick
	III)	Product Name	:	Himalayan Crystal Pendant
		Description	:	High-temperature clear glass, Associate angle tri-angle 51.51° at 38mm in length, 4mm thick

Date Analysed	:	07, 15 & 18 Oct 2009
Equipment used	:	Sodium Iodide Detector from Target Instrument
Software	:	LabTMCA 6.0

Result:

Trace amount of low energy radioactive materials were detected from all three samples.
As its has only low radioactive energy emission, the samples should not cause any health effect to human body.
