

EDG3

ACTIVATE. BOOST. PROTECT.

THE GUARDIAN OF YOUR CELL

You carry at least 700 contaminants in your body. Toxins from the environment can induce your body to generate a lot of free radicals. Your cells are not protected! Even if you're healthy now, toxins build up over time. They're like a ticking time bomb in your body.

Glutathione (GSH) is the **Master Detoxifier** and **Master Antioxidant** that protects your cells from harmful toxins and free radicals. It protects the DNA inside your cells from free radical damage.

GHS helps your liver remove heavy metals, carcinogens (cancer-causing substances), artificial food flavouring and colouring, pesticides and herbicides, pollutants and drug chemicals from your body. With glutathione, all the toxins in your body can be transformed into non-reactive compounds that can be eliminated.

EDG3 is a patented formula from the USA that helps your body produce glutathione – the natural way. It is a cutting-*EDG3* formula invented by world-renowned scientist, Professor Dr Albert B Crum.

EDG3 Uniqueness

- The ONLY Formula that contains all 3 amino acids required for glutathione production
- The ONLY Formula using a breakthrough delivery system that guarantees highest absorption
- The ONLY Formula added with 'Selenomethionine' to maximise potency
- A result of a 25-million-dollar research investment funded by the US National Institutes of Health

Key Benefits

- Detoxifies the liver and cells
- Boosts energy levels
- Strengthens immunity
- Stabilises blood sugar
- Normalises cholesterol
- Lightens skin and reduces pigmentation
- Reduces joint discomfort
