

THE TIMELESS TANZANITE *collection*

BERNHARD H. MAYER

DEPUIS 1871

Out of the ordinary, the alluring Tanzanite has experienced a unique journey from a small magical land nestled deep in the foothills of the majestic Mount Kilimanjaro in Tanzania – the lone source of this remarkable gemstone. Said to be a thousand times rarer than diamonds, its origin is part of this shimmering blue stone's allure and enduring appeal.

Since its discovery by the Maasai tribe in 1967 and the strict protocols developed circa 2002 to protect against illegal mining, the Tanzanian economy has strengthened. Entire communities and thousands of families in the Kilimanjaro vicinity have transformed for the better over the last few decades thanks to the Tanzanite mining industry.

Often referred to by gemmologists as a 'one generation' gemstone, the Tanzanite's source is slowly dwindling. So much so that it may not be available to future generations unless they are lucky enough to inherit a piece of Tanzanite jewellery from those who were smart enough to invest in some today.

The Timeless Tanzanite Collection is our tribute to this exquisite African treasure, featuring these ethically and sustainably sourced gems that contribute to the economic growth of East Africa's largest country.

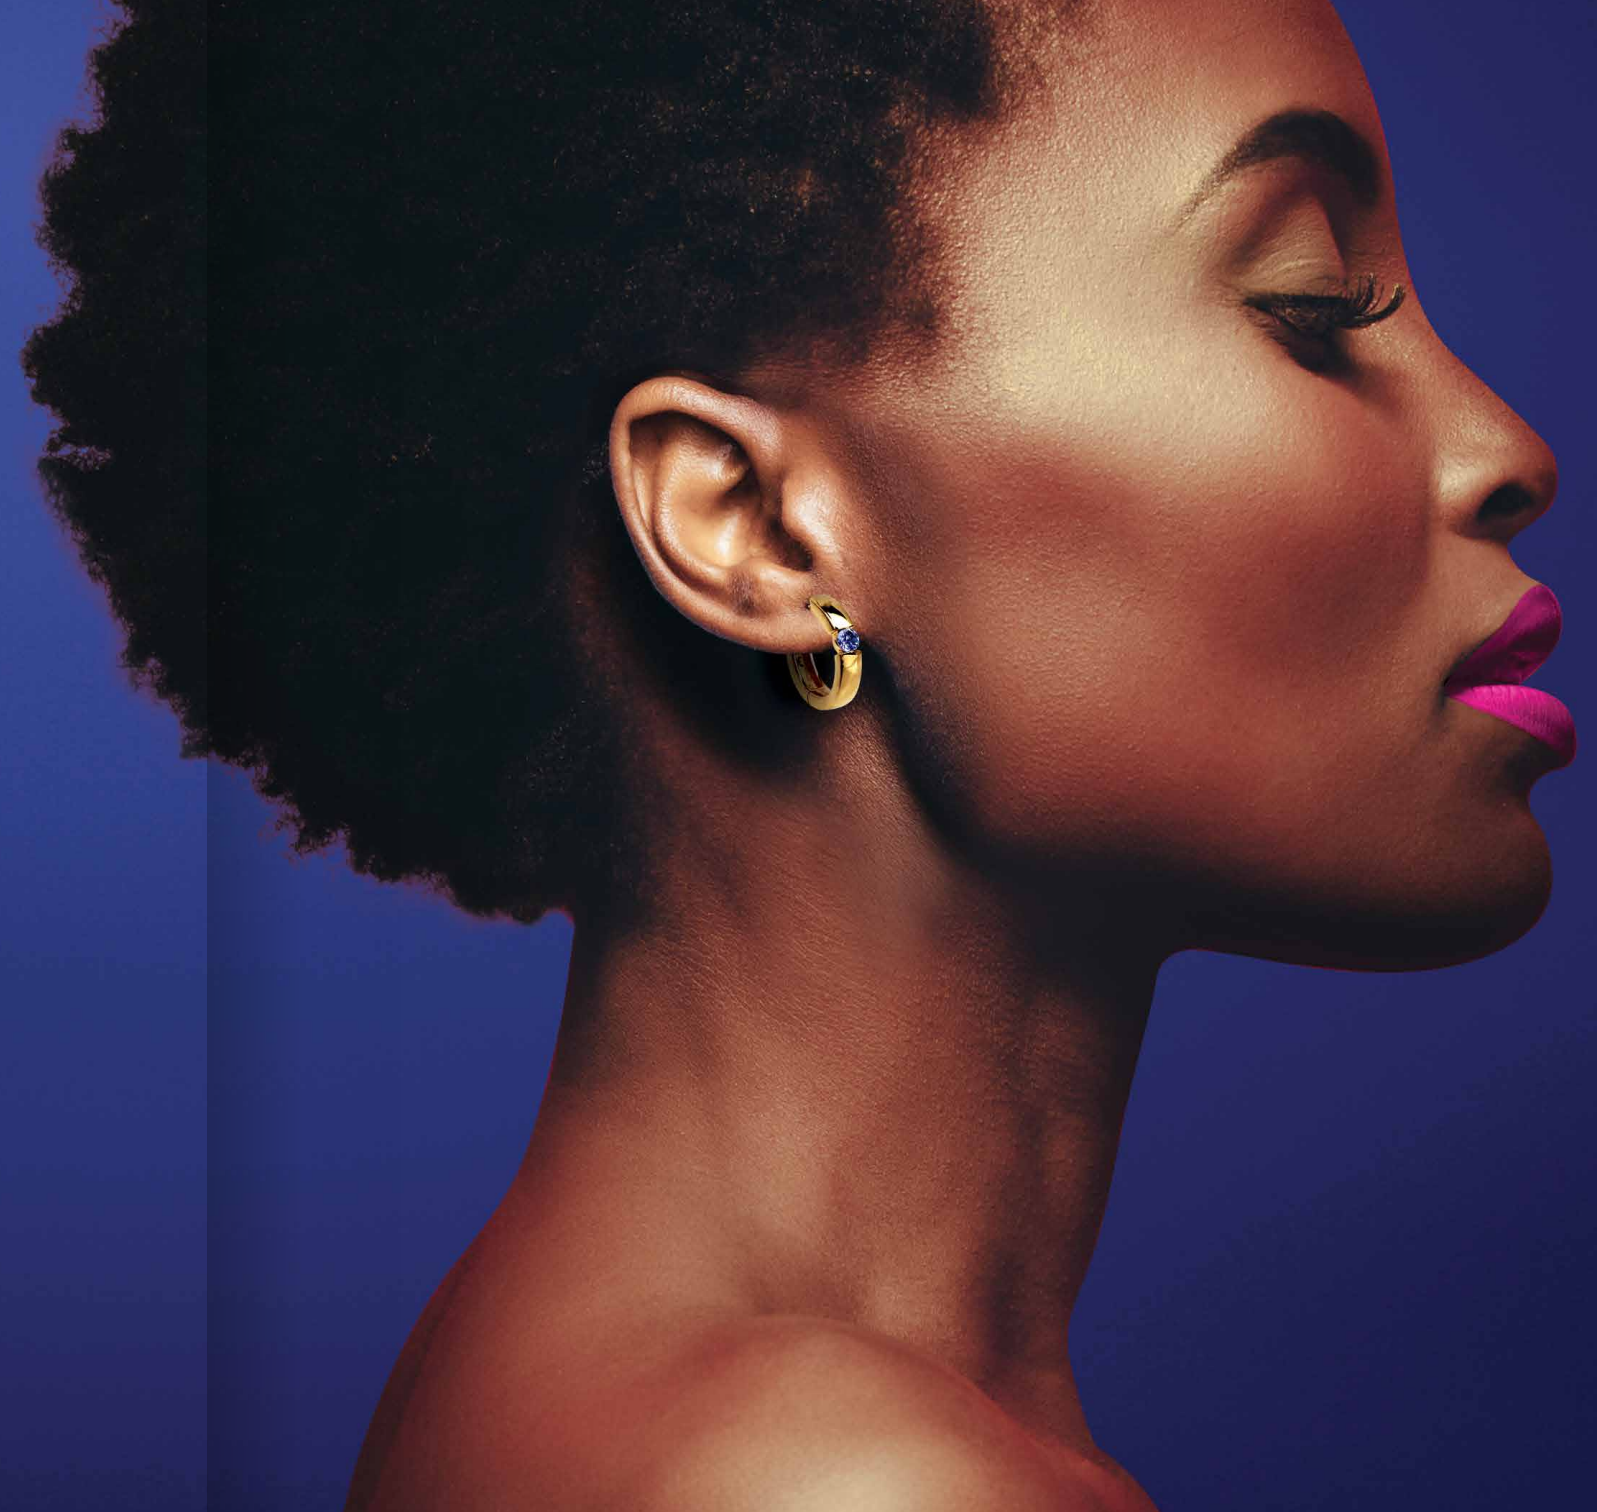

A statement piece for you, a better life for them.

Sophisticated Charm - A tribute to an exceptional African treasure

The Timeless Tanzanite Collection is as singular as the gemstone itself, standing out with its simplicity. Master artisans drew on years of collective hereditary experience to craft a design that would highlight the individualistic beauty of this extraordinary jewel by bringing focus to the solitary gemstone in each work of art.

Every piece is an expression of the exclusivity of this extraordinary African treasure. Paired with the graceful circles of the gold frames, the entire collection exudes

Timelessness, Wholeness, & Perfection.
