

# EDG3

The Breakthrough  
Formulation for  
Cell Protection

Life Qode

# EDG3

uses an advanced U.S. formula with a unique, patented delivery system that is scientifically proven to enhance Glutathione production in your body.

1

Increase the  
Glutathione production  
in your body.

2

Boost your  
immune system.

3

Detoxify your body.

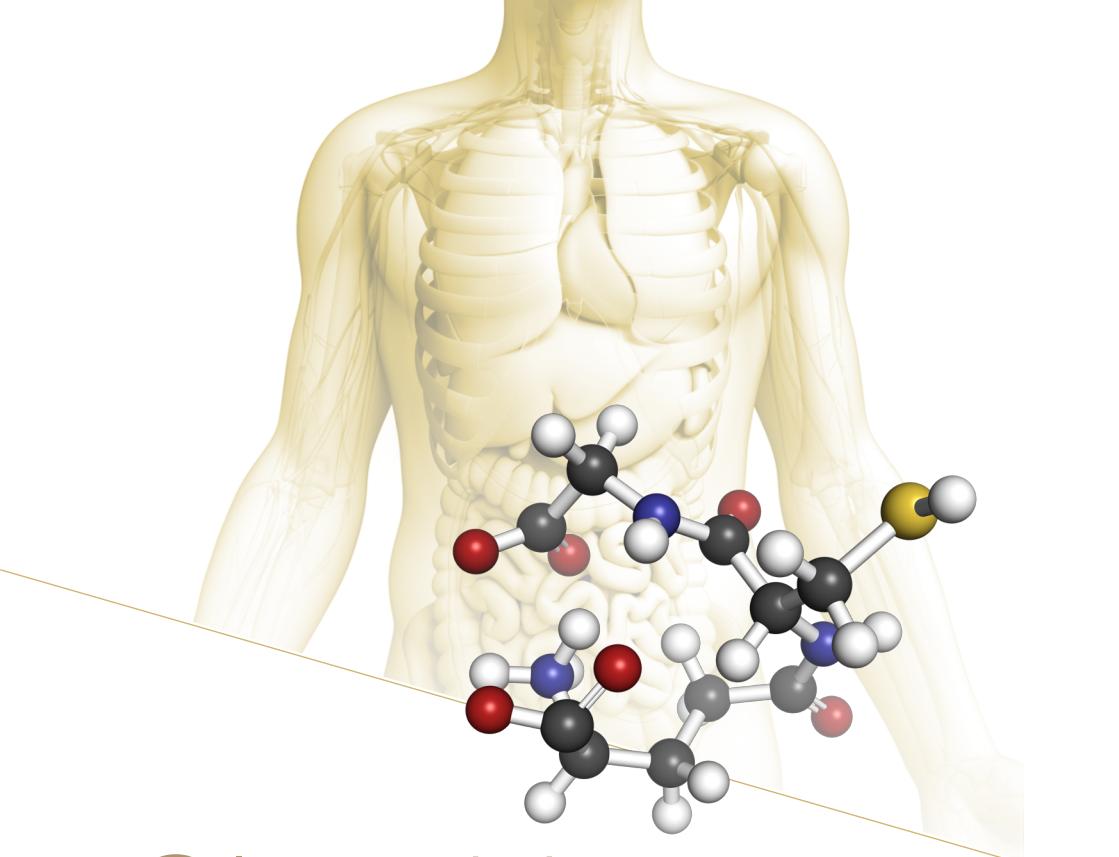

# What is EDG3?

EDG3 is formulated with a patented amino acid blend which includes Glycine, Glutamine, and Cystine - the 3 key building blocks to produce Glutathione.

Glutathione is a well-known Master Antioxidant that can reverse the effects of free radicals in your cells.

Free radicals are contributed by stress, pollution, chemicals, cigarette smoke, high-fat diet, processed food, medication, and more. Too much free radicals will leave your cells vulnerable to premature ageing and all kinds of diseases.

# Glutathione

The Most Powerful Antioxidant in Your Cell  
That Protects You from Over 100 Diseases

Glutathione is scientifically proven in over 99,000 published peer-reviewed studies<sup>[1]</sup>!

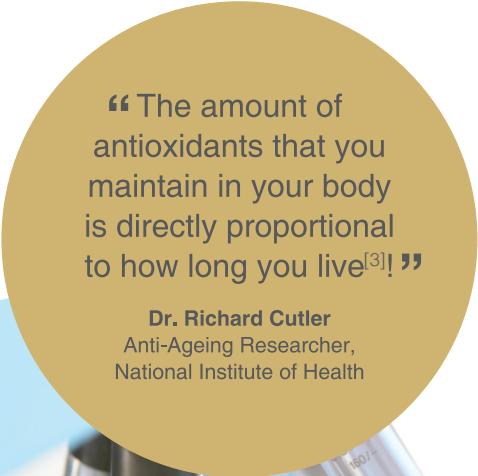

- Stabilises blood sugar
- Improves vision
- Boosts memory
- Lightens skin & reduces pigmentation
- Reduces risk of cancer
- Strengthens immunity
- Normalises cholesterol
- Detoxifies the liver & cells
- Boosts energy levels
- Counters signs of ageing
- Improves heart health
- Reduces joint discomfort

## Free radicals, the biggest enemy of your body

Every day, your cells are being harmed by free radicals. Each cell suffers at least 10,000 hits by free radicals every day, making your cells susceptible to mutation<sup>[2]</sup>. Some of the contributors of free radicals are polluted air, cigarette smoke, stress, alcohol and radiation. Scientists' reports show that free radicals are causal factors in nearly every known disease. Too much of it and you become vulnerable to chronic and serious diseases, premature ageing and a weak immune system.

## Antioxidants are the key

Antioxidants help to protect your cells from damage and reverse the harmful effects of free radicals. Natural forms of antioxidants come in many foods such as berries, nuts and vegetables. Unfortunately, consuming antioxidants from food alone is not enough to combat all the effects of free radicals.

“The amount of antioxidants that you maintain in your body is directly proportional to how long you live<sup>[3]</sup>! ”

**Dr. Richard Cutler**  
Anti-Ageing Researcher,  
National Institute of Health

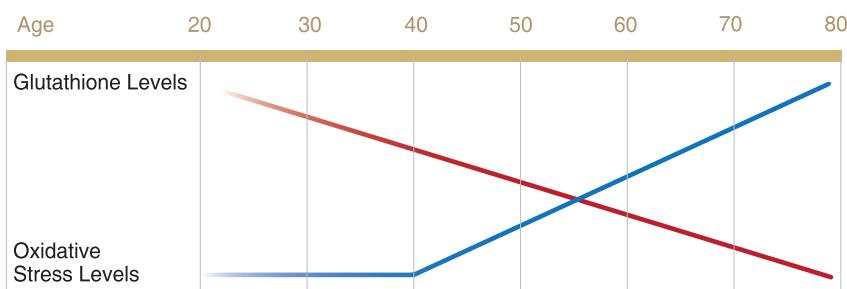

## You need Glutathione, the master of all antioxidants and the most powerful detoxifier

Your body produces a substance called Glutathione to combat free radicals. As you age, your body's production of Glutathione rapidly decreases. While popular theory suggests you can consume supplements that contain Glutathione, it is, in fact ineffective because Glutathione, when consumed as it is, is too easily oxidised in the digestive system and poorly absorbed<sup>[4]</sup>.

The most effective method is to kick-start the Glutathione production from within your body, and in order to do that, you need its precursors - the key building blocks to produce Glutathione.

# 3 interesting facts of Glutathione

- 1 It is different from other antioxidants because it is intracellular<sup>[5]</sup>- it protects the DNA inside your cells.

Unlike other antioxidants such as Vitamin C and E, Glutathione works from inside your cell, acting as your cell's guard that protects your DNA from external attacks.

- 2 Not only does Glutathione help to defend your cells from free radicals, it is also directly involved in many vital biological functions in the body<sup>[6]</sup>.

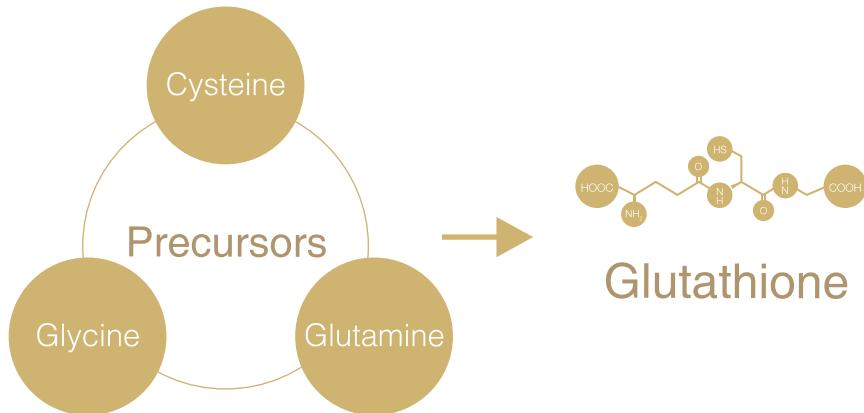

Glutathione's function is irreplaceable, owing to its function in your body's daily metabolic processes such as cell repair and growth, enzyme activation and DNA synthesis.

- 3 It has the unique ability to recycle other antioxidants and make them work better and longer.

Apart from being a powerful antioxidant on its own, Glutathione also helps to double up the efficacy of Vitamin C and E, creating a powerful antioxidant team in your body.

## Not All Formulas are Created Equal

Out of the three amino acids that form the precursor formula to Glutathione's production, Cysteine cannot be absorbed easily because of its unstable nature. It gets destroyed in your digestive tract before reaching your cells. Most Glutathione precursor formulas in the market are using a combination of Cysteine and N-acetyl-cysteine (NAC), which has limited efficacy<sup>[7]</sup>.

You need these 3 precursors - the key building blocks for your body to produce Glutathione.

## EDG3 is The Gold Standard

EDG3 utilises a superior, patented delivery system (US Patent: RE42645 E) that ensures Cysteine can sustain the trip through the digestive system and be absorbed into the cell. It is a breakthrough discovery by a renowned research scientist and physician – Dr Albert Crum, a Harvard alumnus. Through his decades of study, he discovered a unique delivery system using Cystine – a more stable and bioavailable form of Cysteine, which guarantees the highest absorption and maximum potency.

## EDG3 Outperforms any other Glutathione Formulas

Unlike most products in the market, which only have one Glutathione precursor (L-Cysteine), EDG3 provides the complete constituents – Glycine, Glutamine and Cystine – needed for Glutathione synthesis in your body. It also uses a more bioavailable form of Cysteine, which has been scientifically tested to perform better than other Glutathione formulas<sup>[8]</sup>. On top of that, it is combined with Selenomethionine, which is needed for maximum Glutathione effectiveness.

# The remarkable health benefits of **EDG3**

## ① Helps to Optimise Your Liver's Function and Improve Your Detoxification System

When you breathe, and ingest food and water, your body accumulates toxins. You need to depend on your liver to detoxify your body. But high exposure to alcohol, mercury from food, medication, environmental toxins, and chemicals from hair dye and plastic can overload and impair your liver's natural ability to detoxify.

## 2 Helps to Boost Immunity, Preventing Illnesses

Your immune system depends on Glutathione to function.

Glutathione enhances your immune system which is your body's first line of defence to fight off diseases and illnesses. It also has been shown to help stimulate your body's natural response to destroy harmful elements within your body, such as cancer cells.

## 3 Fairer Skin and More Lustrous Hair

Glutathione whitens your skin naturally. It also helps to relieve skin conditions such as acne, dry and itchy skin, and also prevent wrinkles. Glutathione fortifies your hair roots, preventing hair loss and promoting hair growth. It also shields your hair against the damaging effect of excessive dyeing and bleaching.

### Glutathione effectively removes toxins such as:

- Heavy metals
- Carcinogens
- Artificial flavouring & colouring
- Pesticides & herbicides
- Pollutants
- Radiation
- Drugs

# Comprehensive protection for your body

The image features a man and a woman standing side-by-side against a white background. Both individuals have their hands on their hips. The man is on the left, wearing a light blue striped button-down shirt and dark blue trousers. The woman is on the right, wearing a grey short-sleeved top and light green trousers. To the left of the man, there is descriptive text for the nervous system, liver, joints, and other health benefits. To the right of the woman, there is descriptive text for the brain, immune system, pancreas, and another summary statement. A large yellow circle is positioned at the bottom right, containing a bold statement about raising glutathione levels.

**Nerves**  
Alleviates Parkinson's Disease symptoms

**Liver**  
Detoxifies by transforming toxins into non-toxic compounds that can be easily eliminated from the body

**Joints**  
Prevents arthritis and relieves joint pains

**Others**  
Helps prevention against cancer and other dreaded diseases caused by cellular damage

**Brain**  
Improves memory and reduces risk of Alzheimer's disease

**Immune System**  
Prevents common sicknesses such as colds

**Pancreas**  
Regulates blood sugar levels

**Raising Glutathione levels in the body has an impact on almost every disease and sickness! [9]**

# What the experts are saying

“Without Glutathione, other important antioxidants such as Vitamin C and E cannot do their job adequately to protect your body against diseases.”

**Dr. Allan Somersall**

Author of *Breakthrough in Cell-defense*

“The revolutionary U.S. patented blend of amino acids in Immune Formulation 200® is proven to increase Glutathione levels in your body.”

**Datuk Dr. Selvam Rengasamy**

Board Certified Anti-Ageing Physician,  
American Academy of Anti-Ageing &  
Regenerative Medicine

# THE UNIQUENESS OF EDG3

- Using patented formulation from the U.S.
- Scientifically proven to enhance Glutathione production in the body
- Breakthrough Cystine composition for greater absorption and efficacy
- The first and only complete formulation in the market using this patented delivery system
- Added with Selenomethionine to maximise the efficacy
- Convenient, natural and effective

No added sugar.  
Ideal for vegetarians.  
No preservatives, artificial  
flavouring and colouring.  
Gluten-free. GMO-free.

# How to consume

Mix one sachet of EDG3 with 120ml water, stir well, and drink. Best consumed on an empty stomach, in the morning.

EDG3 comes in powder form, which allows for the most effective absorption.

*Individual needs may vary. If you feel sick or weak, it is recommended to consume two (2) packets a day - one in the morning and one in evening.*

Take EDG3 together with Kenta, Berry Xtreme and Alloe V to suit your daily nutritional needs.

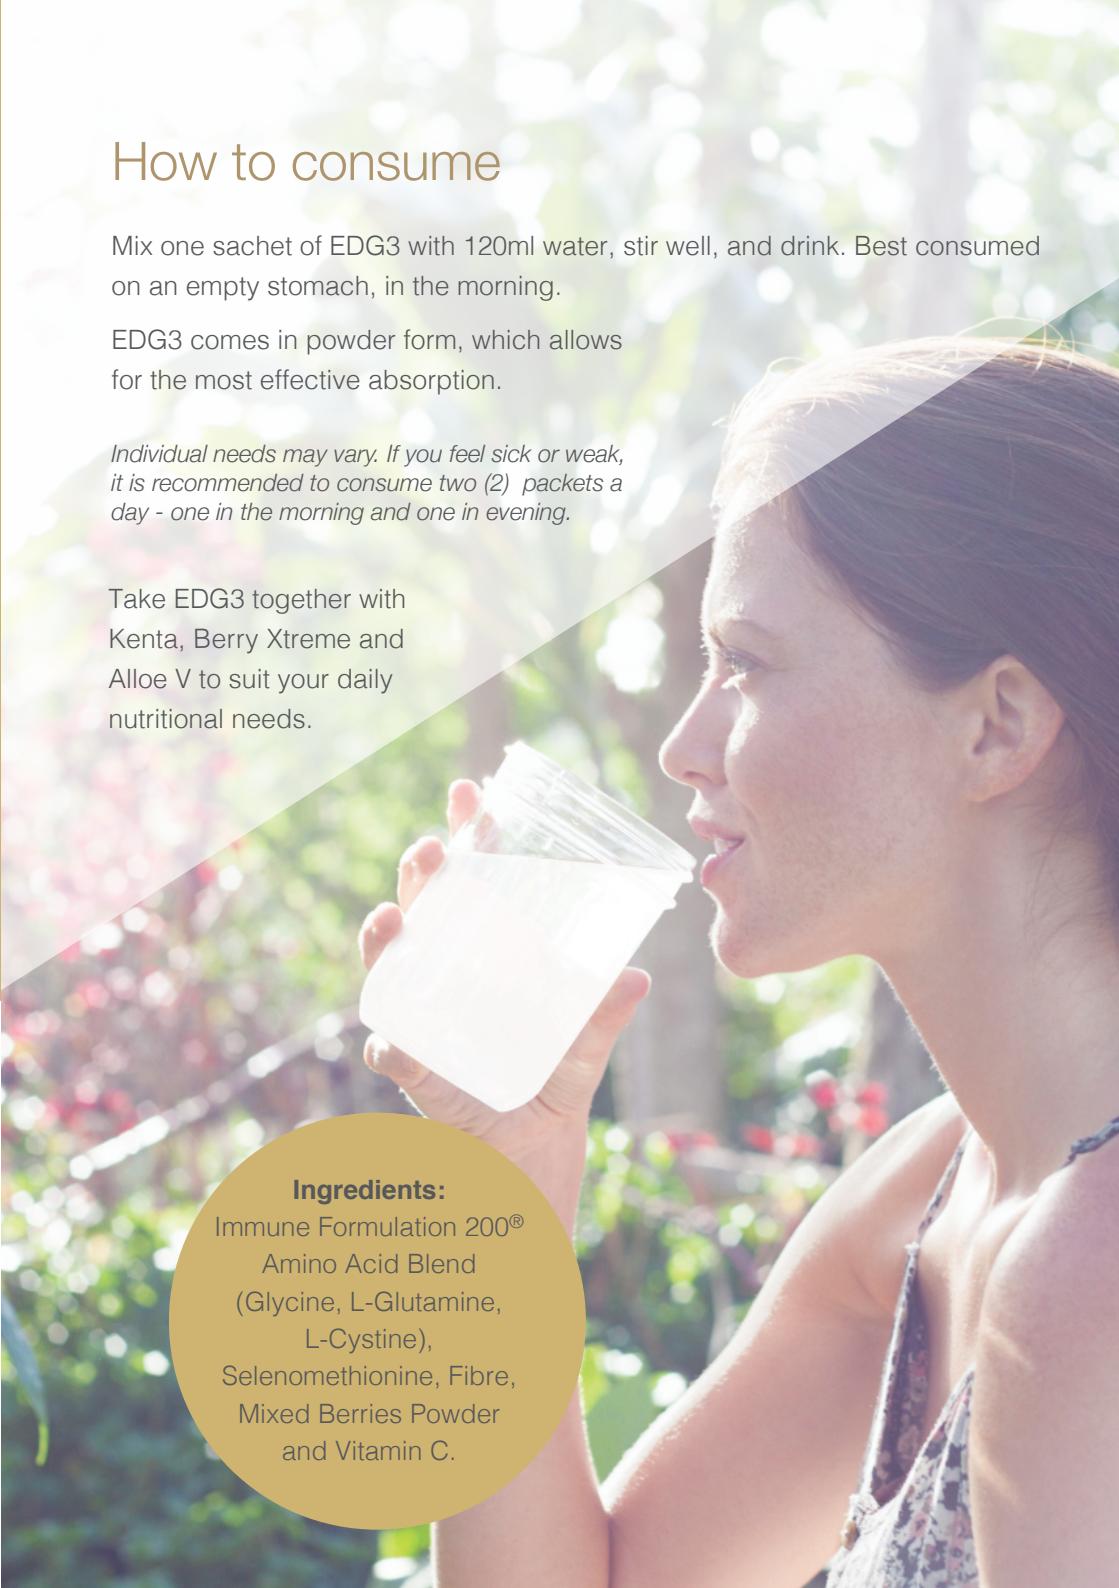

## Ingredients:

Immune Formulation 200®

Amino Acid Blend

(Glycine, L-Glutamine,  
L-Cystine),

Selenomethionine, Fibre,  
Mixed Berries Powder  
and Vitamin C.

## Read about the proven results of EDG3

My husband and I were amazed that we didn't feel jetlagged during our recent 9-day, 4-city U.S. trip. We started each day like we had a full night's sleep, despite getting only 4 hours a night. But best of all, our immune systems remained strong. EDG3 is now our favourite energy booster and immune system protector!

- V Partner Donna Imson-Lecaroz

EDG3 is unbelievable, and so are Kenta and Berry Xtreme Both my weight and blood pressure measurements were greatly improved in 6 months after taking the 3 products. Thank you QNET for bringing these amazing supplements into my life.

- V Partner David Sharma

I've been taking EDG3 for the last 4 months. My family is taking EDG3 as well and we've seen really good effects. My daughter's skin has become better, especially her face. I would encourage each one of you to take EDG3 for your health, for your activity.

- V Partner Ferdinand Tolentino

EDG3 is an amazing flagship product. I've been taking EDG3 for every day since the product was launched. Taking EDG3 is the first thing I do early in the morning. It gives tremendous result. I carry EDG3 everywhere, even when I'm travelling. EDG3 has become a culture in my team; it has become part of their lives. Many people, because of EDG3, are now maintaining good health, looking good, and becoming Diamond and Platinum Stars.

- Associate V Partner Sachin Gupta

After taking EDG3, I can sleep better now and my skin tone has gradually improved. In general, my health and wellbeing have improved immensely ever since I started taking this product.

- Nesamalar

I started seeing results after taking EDG3 for only two weeks. My immune system is better and I feel healthier. Friends and family have complimented me on my skin, telling me I look younger! After seeing the improvements, my teammates started taking EDG3, too. I'm very proud to say, I love EDG3.

- Shiji Annie

My energy levels increased tremendously and I can sleep better! My skin is smoother, fairer and more radiant! My whole family is taking this product every day!

- Zulkipli bin Rosli

I've had skin pigmentation for years. But my pigmentation was reduced after I started taking EDG3 and my skin complexion has improved. My skin is now smoother and brighter.

- Wee Mi Lun

I noticed that my stamina and endurance have increased ever since I've taken EDG3. I've become more productive, active and attentive throughout the day even though I only sleep 4 hours. EDG3 also helps relieve my stomach discomfort whenever I have gastritis.

- Aminuddin Baki bin Abdullah
