

HomePure Eaze

Your Fountain of Life

Great tasting, clean and safe drinking water is an **ABSOLUTE DELIGHT** with HomePure Eaze

HomePure Eaze Water Filtration System
HomePure Eaze 5-Stage Filter Cartridge

Importance of Water

Your body is 70-80% water. So, not only is the amount of water you drink important but the quality of water will also determine whether it heals or harms you. **Healthy water is water that is free of chemical and biological contaminants while still enriched with naturally occurring minerals to support good health and wellness.** Lighter on your pocket, HomePure Eaze provides great tasting, clean and safe drinking water via its 5-stage filter system with ultrafiltration.

Urban Convenience

How often do you arrive home and the first thing you want is a refreshing glass of water? HomePure Eaze is your stylish answer. Designed to look great on your countertop, be the envy of visitors to your home with fast and fresh filtered water on-hand direct from your European-styled HomePure Eaze.

Why HomePure Eaze?

Smaller than handspan,

1. Stylish Countertop Design

With compact European design, keep it on your countertop for water when you want it.

2. Easy Push-Button Operation

Endless glasses of great tasting, clean and safe water at the push of a button!

3. Easy Replacement Filter System

A battery-powered LED indicator reminds you to replace the filter annually.

4. No Electricity Needed

No impact on your power bill.

5. Detachable Hose

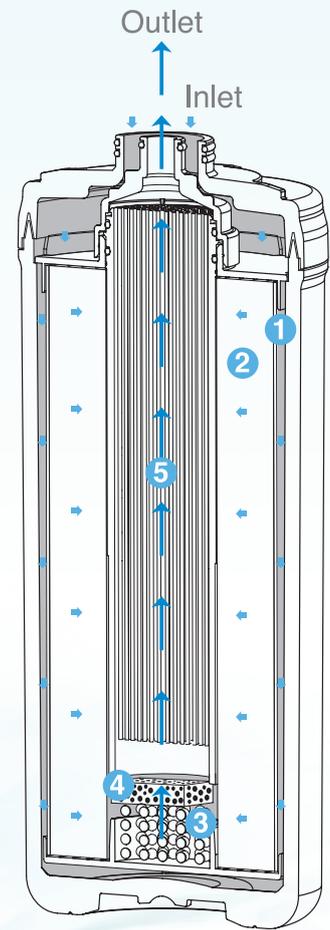

Fill large containers easily using the supplied hose.

5-Stage Water Filtration System

Combining world-class German engineering and Korean manufacturing, HomePure Eaze has 5 stages of filtration to ensure great tasting, clean and safe drinking water for active urban living.

- 1 Sediment Filter**
Removes solids such as rust, mud, sand and sediment larger than 5 microns.
- 2 Activated Carbon Block**
Absorbs turbidity, heavy metals and chemicals such as chlorine, VOCs (volatile organic compounds) and THMs (Trihalomethanes); reduces odour and improves taste.
- 3 Silver Infused Granular Activated Carbon**
Improves flavour by removing residual contaminants; bioactive silver ions inhibit bacterial growth.
- 4 Ion Exchange Resin**
Reduces substances causing water hardness.
- 5 Ultrafiltration Membrane**
Water is passed through tiny hollow fibres measuring 0.01 micron – 0.1 micron wide. Beneficial natural minerals pass through while bacteria and microscopic impurities, which are larger than 0.2 micron, are removed. This includes 100% removal of harmful coliform and E. Coli bacteria.

COMPARING WATER FILTRATION SYSTEMS

HomePure filters are **best-in-class for household use** because they use Ultrafiltration (UF) as their primary method of filtration.

	Ultrafiltration (UF)	Reverse Osmosis (RO)	Ultraviolet (UV)
Reduction of bacteria	Maximum reduction	<ul style="list-style-type: none"> • Maximum reduction • Breakdown of the membrane is possible 	<ul style="list-style-type: none"> • Medium reduction • Bacteria can hide behind sediments or may only be paralysed
Possibility of recontamination	NO	YES (tank)	YES (water around the UV lamp)
Demineralisation	NO	YES	NO
Need for a pump	NO	YES	NO
Need for electricity	NO	YES	YES
High maintenance	NO	YES	YES

Usage Guideline

- ① Designed for use with a metropolitan water supply only (tap water).
- ② Use HomePure Prefilter for low quality tap water (sold separately).
- ③ Use only HomePure Eaze 5-Stage Filter Cartridge available as a repeat product from the QNET eStore.

SAFETY ASSURED

HomePure Eaze is certified by Korea Conformity Laboratories, Korea's leading testing and certification organisation. Our manufacturer is a member of the Korea Accreditation Board and has certified ISO 9001 Quality Management and ISO 14001 Environmental Management Systems. NSF Certification of HomePure Eaze is pending.
