Did You Know?

- We are exposed to new chemicals in water and in the air that never existed
- Survival rates of contagious diseases in the air are from 2 hours for common flu to a year for small pox
- 70% of all contagious diseases are contracted through hand contact
- Our immune systems are being overwhelmed, overworked and over exposed to toxins and stresses of all kinds

Silver in History

- Silver's antibacterial, preservative and restorative powers can be traced as far back as the ancient Greek and Roman Empires
- Phoenicians used to store water, wine and vinegar in silver bottles to prevent spoiling
- Silver was used as a germicide for eating utensils, drinking vessels and dishware to kill disease-causing pathogens

Exclusively available from

QNET

Worldwide Revolutionary Silver

- **Switzerland** manufactured silver water purification filters and tablets to prevent growth of algae and bacteria
- The **former Soviet Union** used silver to sterilise recycled water on their space vehicles
- **Japan** silver is a popular agent in the fight against airborne toxins as well other industrial poisons
- The **Swiss** used silver filters in homes and offices
- Some **US** cities used silver in the treatment of sewage

QNET

SilverSol Technology®

- A newly-patented technology that uses a high level of alternative current to manufacture super charged silver solution with more benefits at a much lower concentration of silver – 5 to 40 parts per million
- It features an engineered nanoparticle with specific size and resonance, allowing a single silver particle to neutralise bacteria continuously and more efficiently

BioSilver

Exclusively available from

QNET

How Does SilverSol Technology[®] Work?

SilverSol Technology[®] uses a two-pronged approach:

- **Silver Oxide**

The silver oxide coating has antibacterial properties, which assist in neutralising the bacterial cell membrane

BioSilver

Exclusively available from

QNET

● Resonance

SilverSol Technology[®] resonates at 890-910 terahertz, the same antimicrobial frequency used in laboratories with antibacterial properties via ultraviolet lights
