## Amezcua DRINK Summary and Certificate

1. Three operational fields of the "Amezcua DRINK" beverages improving device were tested: the effects on the net of the meridians ('Chi' energy and harmony), on the soma (organ functions and colloidal states), and on the vegetative nervous system (Heart Rate Variability to describe stress and the sympathetic and vagal nervous systems). Coffee was taken as sample for beverages because of its possible side effects.
2. In blinded, Placebo controlled and randomized tests four situations were investigated: 1) coffee treated by a Placebo disc, virtual test; 2) coffee treated by a Verum disc, virtual test; 3) coffee treated by a Placebo disc, drink of sip; and 4) coffee treated by a Verum device, drink of sip.
3. The energized "Amezcua DRINK" is able to influence beverages in that way that the harmful components are converted into biologically positive ones, to improve energy and harmony and to balance the bodily autonomous systems suffering from stress. Stomach acidities are reduced.
4. It can be assumed that the increases of energy and harmony and the normalization of the stress-index by means of the Amezcua DRINK will reduce negative environmental and civilization effects. Positive effects of coffee on humans found by scientists are enhanced and improved in that way (as a sample).

## Amezcua EAT

### Summary and Certificate

1. Three operational fields of the "Amezcua EAT" nutrients improving device were tested: the effects on the net of the meridians ('Chi' energy and harmony), on the soma (organ functions and colloidal states), and on the vegetative nervous system (Heart Rate Variability to describe stress and the sympathetic and vagal nervous systems). Tomatoes were taken as samples for food because of their importance.
2. In blinded, Placebo controlled and randomized tests four situations were investigated:  
1) usual tomato treated by a Placebo disc; 2) usual tomato treated by a Verum disc;  
3) Bio-tomato treated by a Placebo disc; and 4) Bio-tomato treated by a Verum disc.
3. The energized "Amezcua EAT" is able to influence nutrients in that way that harmful components are converted into biologically positive ones, to improve energy and harmony and to balance the bodily autonomous systems.
4. It can be assumed that the increases of energy and harmony and the normalization of the stress-index by means of the Amezcua EAT will reduce negative environmental and civilization effects. Positive effects of tomatoes (as a sample) on humans found by scientists are enhanced and improved in that way. The goal of achieving "excellent taste and purely positive biological effects of the nutrient" is attained.

## Amezcua MOVE Summary and Certificate

1. Three operational fields of the "Amezcua MOVE" health improving device were tested: the effects on the net of the meridians ('Chi' energy and harmony), on the soma (organ functions and colloidal states), and on the vegetative nervous system (Heart Rate Variability to describe stress and the sympathetic and vagal nervous systems). Especially positive effects on electrosmog loads were tested.
2. In blinded, Placebo controlled and randomized tests four situations were investigated: 1) the organism treated by a Placebo disc; 2) the organism treated by a Verum disc; 3) electrosmog exposition treated by a Placebo disc; and 4) electrosmog exposition treated by a Verum device.
3. The energized "Amezcua MOVE" is able to influence the whole body positively, to improve energy and harmony and to balance the bodily autonomous systems suffering from stress.
4. It can be assumed that the increases of energy and harmony and the normalization of the stress-index by means of the Amezcua MOVE will reduce negative environmental and civilization burdens like electrosmog.
