<b>Diameter</b>	: 44 mm
<b>Water Resistance</b>	: 5 ATM (50 metres/165 feet)
<b>Movement</b>	: Swiss Quartz-Ronda
<b>Assembly</b>	: Swiss Made

## WATCH CARE

For maximum performance, regularly wipe your watch with a clean, soft cloth. Stains, water spots and dirt that have accumulated on the case, crystal or band may cause premature wear.

For more information on Bernhard H. Mayer® watches and jewellery, visit [www.qnet.net](http://www.qnet.net) or [www.bhmayer.net](http://www.bhmayer.net).

## CARE FOR THE CRYSTAL SURFACE

- A watch may have a scratch-resistant sapphire crystal face, but that doesn't mean you should toss your watch on top of the dresser or into a drawer at the end of the day. It is better to store or wrap it in a soft cloth before placing it down.
- Replace broken or scratched crystals immediately. Even a hairline crack can let dust or moisture into the mechanism, affecting the accuracy.

## CARE FOR RUBBER STRAPS

- Rubber straps should be washed frequently with mild soap and warm water using a soft brush.
- Solvents, oils, perspiration, tanning lotions and salt can cause rubber to deteriorate if not removed.
