

Energy Medicine Report Concerning Energetic Effects by the product "Amezcua Lifestyle Set 2" of QNet Comp., Hongkong

In the following 22 pages we give a report on a **series of tests** using the Meridian Diagnostics (Module of TimeWaver® device), the Heart Rate Variability (System TimeWaver Cardio®), and the Aura-/Chakra diagnostics (Module of the TimeWaver® www.timewaver.de), concerning the biologic-energetic effects made by the **Amezcua Lifestyle Set 2** sent by QNet from Petaling Jaya (Malaysia) (energized, Verum, "A") and similar products (not energized, Placebo, "B"). The set consists of 3 discs: "Drink", "Eat", and "Move".

The test series were performed in a randomized and blinded test procedure. No test person included in the tests knew which one of the two coaster types was which one. At the end the de-blinding took place. The registration and comparison of the following two situations was achieved:

1. Evaluation of the effects of drinking a sip of good water which stood on the disc "Drink" = "A" for 3 minutes
2. Evaluation of the effects of eating a slice of rice bread which lay on the disc "Eat" = "A" for 3 minutes
3. Evaluation of the effects of walking for 3 minutes carrying the disc "Move" = "A" close to the body
4. Evaluation of the effects using Placebo discs "B"

Test persons: twelve (mixed concerning age and sex)

Time of the investigations: February/March 2014

Location of the investigations: Quantica Health Centre, Bichwil, Switzerland

Description of the **theory** behind the energized "**Lifestyle Set 2**":

The biological effects of Hertz waves are well known. Official physics does not accept the second kind of waves, called Tesla waves. Hertz waves oscillate transversally, Tesla waves oscillate longitudinally.

Energy-Medicine Report on the product "Amezcua Lifestyle Set 2"

Experts (e.g. Prof. K. Meyl from Germany, see his books at Appendix page 13) for Tesla (or Scalar) waves agree that those waves are biologically more important. Nature uses them usually. And important means a harmful potential, too, insofar there is no absorbing receiver or antenna but the human tissues only.

As there are no physical measuring devices for Tesla waves on the market, the human organism can and has to be taken as the original and best (because most sensitive) measuring device. Its reactions are detected by the three methods used in this study and described later.

The question is now which criterion inside the body is a good one to detect effects of waves. We have found out that the net of the meridians is very sensitive (Meridian Diagnostics). This method, however, is not generally accepted. Therefore we take as a scientifically accepted method the Heart Rate Variability (HRV) as second principle which allows to detect the status of the stress and of the condition of the vegetative nervous system. The Aura scopy showing the Chakras completes this variety of detectors by measuring the Chakra states of function (both, energy and coherence) which is suitable here because of the names and effects of the discs.

Energy and information can be transferred onto materials by means of Scalar waves and the so-called Nothingness field. The "Energy Shell 2" receives its energization by secret (however, proven) processes.

Let us read what the Amezcua company www.amezcua.com ("Harmonized Energy") writes on the topic of the Lifestyle Set 2:

"No matter who we are, where we come from, or what language we speak, we all have at least one thing in common – in order to survive, we must all drink, eat and move. To lead a healthy life, we need to drink well, we must eat fresh, and we have to move likely. The best way to achieve this is in a balanced and

Energy-Medicine Report on the product "Amezcua Lifestyle Set 2"

harmonised manner to ensure that our drinking and eating habits, and the way in which we move, are all serving our bodies at the optimum level.

If you – like most of us – are concerned about our well-being and are looking for an effective, safe and convenient solution to help to maintain your healthy lifestyle, the Amezcua Lifestyle Set is your soon-to-be best friend! Comprised of three usage-specific discs that are lightweight and durable, the Amezcua Lifestyle Set is an advanced way of living with harmonised energy as you drink, eat and move.

Amezcua products provide you wellness benefits that enhance your quality of life. Now, not only is there for you, but Amezcua is with you as well – at home, in the office, while on vacation, walking down the street, sitting in a café... everywhere and anywhere! This special set has been designed to suit the various activities of your daily life, and to provide you the tools for a healthy lifestyle wherever you go.

The Amezcua Lifestyle Set contains three energy discs – Amezcua DRINK, Amezcua EAT and Amezcua MOVE – each created with specific energy frequencies that are exclusive to the particular application of each individual disc. Much like the rest of the Amezcua product line, the positive energy of the Amezcua Lifestyle Set helps you balance and harmonise your energy levels to leave you feeling refreshed and ready to tackle whatever the day may hold.

Manufactured and energised in Switzerland, the mobility of the Amezcua Lifestyle Set is supported by its aluminium composition – aluminium is remarkable for its light weight, strength, resistance to corrosion and durability. Each disc is made from aluminium, meaning they are not only lightweight for convenient mobility, but also durable, meaning they are practical for an active lifestyle and a long lifespan.

Use each disc of the Amezcua Lifestyle Set for its specific benefits, depending on what you are doing: drinking, eating or moving. The Amezcua Lifestyle Set can

Energy-Medicine Report on the product "Amezcua Lifestyle Set 2"

energise your drinks, enhance your food, and help you move with a bounce in your step.

Key Benefits

Amezcua Drink – Enjoy Every Sip

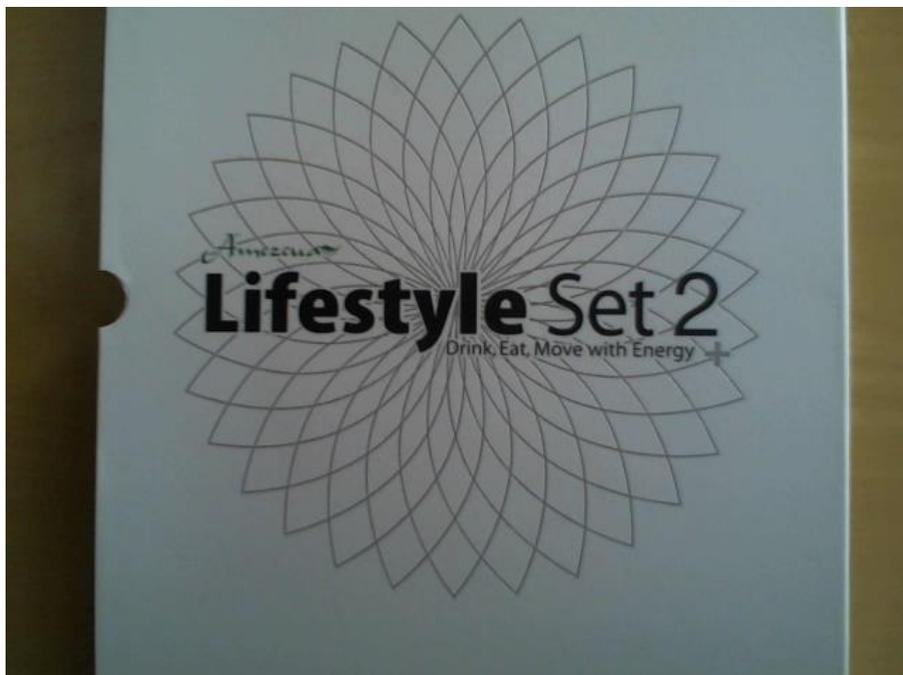

Amezcua Eat – Savour Every Mouthful

Amezcua Move – Energise Every Step

Specifications

- *Description: Round Aluminium Disc*
- *Thickness: 3 mm*
- *Diameter: Drink: 85 mm, Eat: 85 mm, Move: 60 mm"*

Test Methods:

Meridian diagnostics (module within the TimeWaver®)

Asking the individual information field via quantum teleportation for the Chi energy content of the 24 half meridians and additionally the Governor and the Conception vessels, altogether 26 results. Calculating the average, comparing of the actual one with the average of the measurement just before: changing of the "state of energy".

The basic theory says that the average value of the energy contents of the 26 meridians represents the state of the „Chi“, which corresponds to the TCM description of the life energy.

Energy-Medicine Report on the product "Amezcua Lifestyle Set 2"

The value of a measurement which just happened is the basic value for the next measurement, the change of which is shown as percent. Increases of the conductance of more than 7 % are judged as a „yes“, and 7 % decreases as a „no“, with the neutral range between + and - 7 %.

The meridian diagnostics is working on the levels of **energy and information**. It contains the vegetative and autonomous regulations of the body systems. There are 24 half meridians and additionally the unpaired Conception vessel and the Governor vessel, hence, adding up to 26 meridians to be distinguished.

Heart Rate Variability (*System TimeWaver Cardio™*)

The time distance between two beats of the heart measured within the ECG (R-R-distance) should vary within a certain range. No variations represent a kind of rigidity and are as pathological as too high variations showing a chaotic state of the regulation. This is performed by the vegetative (or autonomous) nervous system (VNS) consisting of the Sympathicus accelerating the heart by its adrenalin and of the Parasympathicus = Vagus making the heart calm by its acetylcholine.

Thus by analyzing the R-R-distances the function of the VNS can be evaluated. As concerning the VNS stress is the most important influencing factor, the stress situation of the person will result, too. A measurement is made in rest and usually takes five minutes. The most interesting values are the 'Stress-Index' (quotient between height and width of the columns within a frequency distribution plot) and the relationship 'VLF/HF' (very low frequency/high frequency, both derived from the spectral analysis). They should be close to their normal values which are: Stress Index SI = 100, VLF/HF (Sympathicus/Parasympathicus) = 2.0.

Aura- and Chakra scopy (*module within the TimeWaver™*)

Energy-Medicine Report on the product "Amezcua Lifestyle Set 2"

Asking the individual information field via quantum teleportation for the Chi energy content and coherence of the 7 chakras which together form the aura. Calculating the average, comparing of the actual one with the average of the measurement just before: changing of the "state of energy and of coherence".

The basic theory says that the average value of the energy contents of the 7 chakras represents the state of the „Chi“ which corresponds to the TCM description of the life energy.

Design of the study

The test persons are sitting. Either the Verum or the Placebo discs are used in order to influence water to drink, rice bread to eat and to move for three minutes. After testing the other ones followed by another test run. A comparison is made by testing the variation of the test method.

The three test methods are performed before this exposure and with it. Within this time nothing else happens and care is taken for a quiet atmosphere.

Preparation of the test persons:

A provocation is made by a "Biocomb" on the hairy skull, or by a piezo stick ("Paingone", 7 pressings on the point Gov. 20). Then a de-switching procedure follows for the purpose of a synchronisation of the brain. For that purpose two practices are as follows: 1) with crossed forearms four finger tips are put above the eyebrows, the thumbs below, then 20 – 30 sec. soft massage by moving the skin, 2) with crossed forearms for 20 – 30 sec. a soft massage of the ears.

Every person having had a mobile phone call of longer than 2 min should perform this practice afterwards. The reason is that in the present era of electro-smog pollution a lot of people are in the state of "switching" temporarily or even

Energy-Medicine Report on the product "Amezcua Lifestyle Set 2"

continuously. The parts of the brain are dissociated or desynchronized or fragmented in this situation. In case of PC working this can be found after 3 hours work without shielding regularly.

The effect of this that test methods which include the central nervous system, will show false or paradox results as the brain (like the immune system) can no longer decide what is good and what is bad for the person. Intellect, emotions, and affects are fighting each other without association or communication. A tendency to an addiction will develop, e.g. conc. coffee, chocolate, cigarettes, or even the electro-smog itself. Software programmers are often suffering from that.

Examinations and investigations concerning energy variations, which are not taking this problem into consideration, are not safe or believable. A typical result is that a test person who is in a state of switching = de-synchronisation, shows an increase of his energy and harmony during a mobile phone call of more than 2 min, whereas after the de-switching practice he shows the normal result of a decrease.

Test procedure

1. Basic measurements
2. Preparation of the test person, control measurements
3. Measurement with "A" or "B": Drink
4. Measurement with "A" or "B": Eat
5. Measurement with "A" or "B": Move
6. Measurement with "B" or "A"
7. Control measurements

The sequence of the tests of the discs und tests "A" and "B" was randomized.

Interpretation of the results of tables 1, 2, 3, and 4: effects of the "Amezcua Lifestyle Set 2" on stress state, vegetative nervous system, Chì energy and harmony, and Chakra energy and aura coherence of the human organism in comparison with placebo items and controls.

Meridians system (table 1):

All Verum discs result in clear positive significances compared to placebo discs.

Heart Rate Variability ≈ Vegetative Nervous System (VNS) (table 2):

It was difficult to select from the many results of the HRV important ones which combine several criteria. We have chosen the Dis-stress-Index. The reason was that we did not intend to make a diagnosis of the heart function but the VNS which reacts on changes of balancing and information.

The Verum discs "Drink" and "Move" result in clear positive significances compared to placebo discs. Concerning the "Eat" disc the effect is weaker. It seems that the vegetative nervous system reacts not so sensitive to bread.

Aura and chakras (table 3):

The results correspond to those of the Meridians system examinations. All Verum discs result in clear positive significances compared to placebo discs.

Discussion

It is necessary for all of us to find possibilities which are able to strengthen the sensitive systems of the organism against negative influences which nowadays exist everywhere. An energy increase and a balancing of the meridians, of the vegetative nervous systems, and of the chakras are most important ways to achieve that goal.

In addition we all lose energy and harmony by vegetative instability caused by stress. Many people try to compensate for that by stimulators like caffeine or the amino acid taurine during the day and downers like alcohol in the evening. This way of life, however, is a risky one and will not lead to a positive target. Better we use a method which can give us an improvement concerning a normal and harmonious function of our vegetative nervous system which should become resistant to stress.

A stress resistance and a harmony of the body systems allow a higher performance in the fields of wellness and fitness.

The new and energized "Amezcua Lifestyle Set 2" examined here is a valuable instrument for the achievement of this goal. Energy and harmony are improved simultaneously. The placebo product results in overall neutral effects which may or should be a typical placebo effect.

The overall table 4 shows clear and impressive results.

Summary and Certificate derived from our „life energy tests“

- 1. Three operational fields of the energized "Amezcua Lifestyle Set 2" (discs "Drink", "Eat" and "Move") compared to Placebos were tested: the effects on water, bread and moving measured by examinations of the vegetative nervous system (Heart Rate Variability to describe stress and the sympathetic and vagal nervous systems), of the net of the meridians ('Chi' energy and harmony), and of the Chakras (energy and coherence states). The tests were performed as randomized, placebo-controlled, and blinded test procedures.**
- 2. The energized "Amezcua Lifestyle Set 2" is able to balance the human autonomous systems, to improve and strengthen energy and harmony, and to harmonize the Chakras suffering from stress via drinking water ("Drink"), eating bread ("Eat") and moving ("Move"). Concerning the comparison with Placebo discs the differences are significant, partly highly significant.**
