

# Energy Medicine Report

## Concerning Energetic Effects by the product "Amezcua Energy Shell 2" of QNet Comp., Hongkong

In the following 22 pages we give a report on a **series of tests** using the Meridian Diagnostics (Module of TimeWaver® device), the Heart Rate Variability (System TimeWaver Cardio®), and the Aura-/Chakra diagnostics (Module of the TimeWaver® [www.timewaver.de](http://www.timewaver.de)), concerning the biologic-energetic effects made by the **Amezcua Energy Shell 2** sent by QNet from Petaling Jaya (Malaysia) (energized, Verum, "A") and a similar product (not energized, Placebo, "B").

The test series were performed in a randomized and blinded test procedure. No test person included in the tests knew which one of the two shell types was which one. At the end the de-blinding took place. The registration and comparison of the following two situations was achieved:

1. Evaluation of the effects with having the Verum "A" in the left hand
2. Evaluation of the effects with having the Placebo "B" in the left hand
3. Evaluation of the variation of the methods by testing twice.

**Test persons:** twelve (mixed concerning age and sex)

**Time of the investigations:** February/March 2014

**Location of the investigations:** Quantica Health Centre, Bichwil, Switzerland

Description of the **theory** behind the energized "**Energy Shell 2**":

The biological effects of Hertz waves are well known. Official physics does not accept the second kind of waves, called Tesla waves. Hertz waves oscillate transversally, Tesla waves oscillate longitudinally.

Experts (e.g. Prof. K. Meyl from Germany, see his books at Appendix page 13) for Tesla (or Scalar) waves agree that those waves are biologically more

## Energy-Medicine Report on the product "Amezcua Energy Shell 2"

important. Nature uses them usually. And important means a harmful potential, too, insofar there is no absorbing receiver or antenna but the human tissues only.

As there are no physical measuring devices for Tesla waves on the market, the human organism can and has to be taken as the original and best (because most sensitive) measuring device. Its reactions are detected by the three methods used in this study and described later.

The question is now which criterion inside the body is a good one to detect effects of waves. We have found out that the net of the meridians is very sensitive (Meridian Diagnostics). This method, however, is not generally accepted. Therefore we take as a scientifically accepted method the Heart Rate Variability (HRV) as second principle which allows to detect the status of the stress and of the condition of the vegetative nervous system. The Aura scopy showing the Chakras completes this variety of detectors by measuring the Chakra states of function (both, energy and coherence) which is suitable here because of the names and effects of the discs.

Energy and information can be transferred onto materials by means of Scalar waves and the so-called Nothingness field. The "Energy Shell 2" receives its energization by secret (however, proven) processes.

Let us read what the Amezcua company [www.amezcua.com](http://www.amezcua.com) ("Harmonized Energy") writes on the topic of the Energy Shell 2:

*"Bring energy to life. We use water in every aspect of our daily lives. If you can find a way to instantly energise water to improve the quality of your shower and washing water, this will help boost your well-being as well as keep you refreshed, balanced and harmonised.*

*The Amezcua Energy Shell 2 is a remarkable scientific breakthrough that provides you with hydrating, energy-enhanced water. You can enhance your*

## **Energy-Medicine Report on the product "Amezcua Energy Shell 2"**

*drinking and washing water by attaching the Amezcua Energy Shell 2 onto the inlet hose of your HomePure water filtration system, washing machine, or dishwasher.*

*The energised water carries detergent thoroughly into materials due to its surface tension value being close to that of pure water. This means a more economical way of washing your laundry and dishes as it reduces the amount of detergent used. With less detergent used, wastewater discharged from your washing machine or dishwasher is also more environmentally friendly.*

### *Key Benefits*

- *Drink water energised by Amezcua Energy Shell 2 to balance your energy levels and make you feel refreshed and harmonised.*
- *Improve the quality and effectiveness of water used in your laundry and dishwashing.*
- *Help make your washing environmentally friendly and economical.*

### *Specifications*

- *Description:           Stainless Steel*
- *Length:                 60 mm*
- *Inner Diameter: 15 mm*

*The Amezcua Energy Shell 2 is also designed for use with a domestic shower and HomePure water filtration system."*

*In our study we put the Amezcua Energy Shell 2 into the left hands of the test persons, as within our body tissues esp. in the matrix we have more than 70% of body water. This should be influenced by the shell in the same way or even more intensely than simple hose water."*

## Energy-Medicine Report on the product "Amezcua Energy Shell 2"

Picture of the Amezcua Energy Shell 2

### Test Methods:

#### ***Meridian diagnostics*** (module within the TimeWaver®)

Asking the individual information field via quantum teleportation for the Chi energy content of the 24 half meridians and additionally the Governor and the Conception vessels, altogether 26 results. Calculating the average, comparing of the actual one with the average of the measurement just before: changing of the "state of energy".

## Energy-Medicine Report on the product "Amezcua Energy Shell 2"

The basic theory says that the average value of the energy contents of the 26 meridians represents the state of the „Chi“, which corresponds to the TCM description of the life energy.

The value of a measurement which just happened is the basic value for the next measurement, the change of which is shown as percent. Increases of the conductance of more than 7 % are judged as a „yes“, and 7 % decreases as a „no“, with the neutral range between + and - 7 %.

The meridian diagnostics is working on the levels of **energy and information**. It contains the vegetative and autonomous regulations of the body systems. There are 24 half meridians and additionally the unpaired Conception vessel and the Governor vessel, hence, adding up to 26 meridians to be distinguished.

### **Heart Rate Variability** (*System TimeWaver Cardio™*)

The time distance between two beats of the heart measured within the ECG (R-R-distance) should vary within a certain range. No variations represent a kind of rigidity and are as pathological as too high variations showing a chaotic state of the regulation. This is performed by the vegetative (or autonomous) nervous system (VNS) consisting of the Sympathicus accelerating the heart by its adrenalin and of the Parasympathicus = Vagus making the heart calm by its acetylcholine.

Thus by analyzing the R-R-distances the function of the VNS can be evaluated. As concerning the VNS stress is the most important influencing factor, the stress situation of the person will result, too. A measurement is made in rest and usually takes five minutes. The most interesting values are the 'Stress-Index' (quotient between height and width of the columns within a frequency distribution plot) and the relationship 'VLF/HF' (very low frequency/high frequency, both derived from the spectral analysis). They should be close to their normal values which are: Stress Index SI = 100, VLF/HF (Sympathicus/Parasympaticus) = 2.0.

## Energy-Medicine Report on the product "Amezcua Energy Shell 2"

### ***Aura- and Chakra scopy*** (module within the TimeWaver™)

Asking the individual information field via quantum teleportation for the Chi energy content and coherence of the 7 chakras which together form the aura. Calculating the average, comparing of the actual one with the average of the measurement just before: changing of the "state of energy and of coherence".

The basic theory says that the average value of the energy contents of the 7 chakras represents the state of the „Chi“ which corresponds to the TCM description of the life energy.

### **Design of the study**

The test persons are sitting. Either the Verum or the Placebo shells are put into the left hands resp., and after testing the other ones followed by another test run. A comparison is made by testing the variation of the test method.

Why into the left hand? It is one of the entrance doors of the organism. And the energized water by means of the shell shall result in a benefit for the organism.

The three test methods are performed before this exposure and with it. Within this time nothing else happens and care is taken for a quiet atmosphere.

### **Preparation** of the test persons:

A provocation is made by a "Biocomb" on the hairy skull, or by a piezo stick (7 pressings on the point Gov. 20). Then a de-switching procedure follows for the purpose of a synchronisation of the brain. For that purpose two practices are as follows: 1) with crossed forearms four finger tips are put above the eyebrows, the thumbs below, then 20 – 30 sec. soft massage by moving the skin, 2) with crossed forearms for 20 – 30 sec. a soft massage of the ears.

## **Energy-Medicine Report on the product "Amezcua Energy Shell 2"**

Every person having had a mobile phone call of longer than 2 min should perform this practice afterwards. The reason is that in the present era of electro-smog pollution a lot of people are in the state of "switching" temporarily or even continuously. The parts of the brain are dissociated or desynchronized or fragmented in this situation. In case of PC working this can be found after 3 hours work without shielding regularly.

The effect of this that test methods which include the central nervous system, will show false or paradox results as the brain (like the immune system) can no longer decide what is good and what is bad for the person. Intellect, emotions, and affects are fighting each other without association or communication. A tendency to an addiction will develop, e.g. conc. coffee, chocolate, cigarettes, or even the electro-smog itself. Software programmers are often suffering from that.

Examinations and investigations concerning energy variations, which are not taking this problem into consideration, are not safe or believable. A typical result is that a test person who is in a state of switching = de-synchronisation, shows an increase of his energy and harmony during a mobile phone call of more than 2 min, whereas after the de-switching practice he shows the normal result of a decrease.

### **Test procedure**

1. Basic measurements
2. Preparation of the test person, control measurements
3. Measurement after 1 minute of having either Verum A or Placebo B in the left hand
4. Control measurements
5. Measurement after 1 minute of having the other shell in the left hand
6. Control measurements

The sequence of the tests of the media "A" and "B" was randomized.

## Results

### Exposure to the Verum shell and to the Placebo shell

#### 1) Meridian Diagnostics

**Table 1, Changes of the average Ch'ì energy:**

**A = effects by Verum (A)**

**B = effects by Placebo (B)**

**C = control measurements (variation)**

Tests	A	B	C

<b>Stan err</b>	<b>4.56</b>	<b>2.21</b>	<b>1.74</b>

**Statistical evaluation of table 3**

Acc. to Student`s t-test the following significant differences exist:

A vs. B: significant for  $p = 0.0007$  (highly significant)

A vs. C: significant for  $p = 0.0012$  (significant)

B vs. C: significant for  $p = 0.71$  (not significant)

**Overview table (4) comparing all situations (averages)**

	<b>A</b>	<b>B</b>	<b>Control</b>
<b>HRV</b>	<b>+ 8.92</b>	<b>0.50</b>	<b>-0.49</b>
<b>Merid</b>	<b>+ 10.9</b>	<b>-1.67</b>	<b>0.67</b>
<b>Chakra</b>	<b>+18.83</b>	<b>-2.42</b>	<b>-0.83</b>
<b>Evaluation</b>	<b>all positive</b>	<b>neutral</b>	<b>neutral</b>

**Interpretation of the results of tables 1, 2, 3, and 4: effects of the "Amezcua Energy Shell 2" on stress state, vegetative nervous system, Chì energy and harmony, and Chakra energy and aura coherence of the human organism in comparison with a placebo shell and controls.**

**Heart Rate Variability ≈ Vegetative Nervous System (VNS) (table 1):**

Verum shell A shows overall positive effects. The Placebo shell B results in neutral findings similar to the control measurements. The significances of the differences are clear or high, resp., beside B vs. C.

**Meridians system (table 2):**

The results correspond to those of the HRV/VNS examinations.

**Aura and chakras (table 3):**

It was difficult to select from the many results of the HRV important ones which combine several criteria. We have chosen the Dis-stress-Index. The reason was that we did not intend to make a diagnosis of the heart function but the VNS which reacts on changes of balancing and information.

The results correspond to those of the HRV/VNS examinations, however, the significances are higher, corresponding to the higher sensitivity of the aura.

## **Discussion**

It is necessary for all of us to find possibilities which are able to strengthen the sensitive systems of the organism against negative influences which nowadays exist everywhere. An energy increase and a balancing of the meridians, of the vegetative nervous systems, and of the chakras are most important ways to achieve that goal.

In addition we all lose energy and harmony by vegetative instability caused by stress. Many people try to compensate for that by stimulators like caffeine or the amino acid taurine during the day and downers like alcohol in the evening. This way of life, however, is a risky one and will not lead to a positive target. Better we use a method which can give us an improvement concerning a normal and harmonious function of our vegetative nervous system which should become resistant to stress.

A stress resistance and a harmony of the body systems allow a higher performance in the fields of wellness and fitness.

The new and energized Amezcua Energy Shell 2 (A) examined here is a valuable instrument for the achievement of this goal. Energy and harmony are improved simultaneously. The placebo product results in overall neutral effects which may or should be a typical placebo effect.

The overall table 4 shows clear and impressive results.

## Summary and Certificate derived from our „life energy tests“

- 1. Three operational fields of the energized "Amezcua Energy Shell 2" (Verum) compared to Placebos were tested: the effects on the vegetative nervous system (Heart Rate Variability to describe stress and the sympathetic and vagal nervous systems), on the net of the meridians ('Chi' energy and harmony), and on the Chakras (energy and coherence states). The tests were performed as randomized, placebo-controlled, and blinded test procedures.**
- 2. The energized "Amezcua Energy Shell 2" is able to balance the human autonomous systems, to improve and strengthen energy and harmony, and to harmonize the Chakras suffering from stress. Concerning the comparison with a Placebo and control measurements the differences are significant, partly highly significant.**
