

## **AMEZCUA BIO LIGHT 3 FAQs**

### **1. What is Amezcua Bio Light 3?**

Amezcua Bio Light 3 is a breakthrough in biophoton light therapy. Combined with Amezcua Bio Disc 3, it has a unique synergy of colour's energies and frequencies for maintaining and restoring our wellbeing.

### **2. Does Amezcua Bio Light 3 affect the functionality of Amezcua Bio Disc 3?**

Yes, in every way. When you shine the Amezcua Bio Light 3 through the Amezcua Bio Disc 3, you improve the disc's ability to produce biophotonic beams that enhance the body's energy levels and improve physical conditions, helping in managing pain, inflammation and increasing positive vibrations in the surrounding environment.

### **3. What is a biophotonic beam? How is it important to our well-being?**

A biophotonic beam carries biophotons, the smallest physical units of light, which are virtually in control of every biochemical reaction that occurs in the body - including its ability to function. Biophotons are found in the cells of all living organisms and are responsible for activating the power stations (mitochondria) of the cells, thus contributing to the release of energy throughout the body.

### **4. How does Amezcua Bio Light 3 work?**

Amezcua Bio Light 3 emits light or photons which can be absorbed by human skin and travel through the body's nervous system to the brain, where they help regulate what is referred to as our human bioenergy. By stimulating certain areas of the body with specific quantities of light, biophoton therapy can help reduce pain as well as aid in various healing processes and improving numerous health conditions, achieving a greater state of mental and emotional health.

### **5. How to use Amezcua Bio Light 3?**

**Step 1:** Unlock the top compartment by rotating the lid anti-clockwise.

**Step 2:** Place the Amezcua Bio Disc 3 inside the Amezcua Bio Light 3 compartment (convex facing upwards).

**Step 3:** Touch and hold the POWER sensor for 5-7 seconds and shine the Bio Light 3 on the desired part of your body.

**Step 4:** Slightly press the COLOR sensor to choose the light colour mode according to your needs. (refer to next question). With each slight press, the colour will change from red, green, blue, to white.

**Step 5:** Use this for 3-4 sessions a day, 15 minutes per session.

6. How do I choose a suitable light colour mode?

Choose the colour mode according to your needs or body conditions. Each colour mode has its own different benefits, which serve different purposes.

#### **Near-Infrared (NIR)**

- Aids in wound healing
- Improves blood circulation
- Managing pain
- Helps with skin rejuvenation

#### **Red**

- Elevates mood
- Activates hormones
