

ENHANCED LED INDICATOR

HomePure Nova has a 'lifetime mode', an LED and beep buzzer that can detect both the age and water volume of the filter cartridge lifespan, and allow it to be identified by the different LED lights.

HOMEPURE WATER IS PI-WATER

HomePure Nova makes Pi-Water based on Dr Akihiro Yamashita's 1964 research. The water is treated with microscopic quantities of Ferric Ferrous salt (Fe_2Fe_3) to mimic living body water and transform it into **Pi-Water, the water of life**.

Because Pi-Water is similar to 'living body water', it allows the body to better absorb the oxygen and minerals in water molecules.

Pi-Water plays a key role in regulating important functions in living bodies such as:

- triggering a plant to flower;
- stimulating an immune response; and,
- destroying free radicals.

VALIDATED AND ENDORSED BY THIRD-PARTY PROFESSIONALS

NSF International

Certified for:

- NSF/ANSI 42 - Reducing chlorine, taste, and odour
- NSF/ANSI 53 - Reducing health-related contaminants like particulates, lead, volatile organic chemicals, and asbestos
- NSF/ANSI 401 - Reducing emerging contaminants like some prescription/OTC drugs, flame retardants, detergents, new types of pesticides and herbicides
- NSF/ANSI P231 - Removing microbiological contaminants like bacteria, viruses, and protozoa*

*NSF/ANSI P231 is undergoing certification testing at the time of printing of this blitz card.

Korea Conformity Laboratories

Certified for General Purification Ability and Capacity of Water Purifier. Tested for Lead Reduction.

ENJOY CLEAN, HEALTHY,
AND GREAT TASTING
WATER TODAY WITH
HOMEPURE NOVA,
YOUR NEXT STEP
TO ABSOLUTE LIVING!

CLEAN WATER,
PURE LIFE!

System Tested and Certified by NSF International against NSF/ANSI Standard 42, 53, and 401 for the specific performance claims specified on the Performance Data Sheet.

IT'S THE HOMEPURE FILTRATION SYSTEM YOU LOVE, WITH WORLD-CLASS QUALITY, DESIGN, AND TECHNOLOGY – ONLY MADE EVEN BETTER WITH **9 STAGES OF FILTRATION** AND **35+ ULTRATECH FILTER TECHNOLOGY**!

KEY BENEFITS

- Provides clean, safe, and great tasting drinking water enriched with minerals
- Transforms drinking water to Pi-Water for your holistic well-being
- Allows you to save energy because it requires no electricity to operate
- Lets you enjoy drinking water conveniently with its user-friendly, world-class design

NEXT-LEVEL INNOVATION:

9-in-1
Filtration

1

SEDIMENT FILTER

Removes rust and sediments larger than 5 microns.

2

HIGH-PERFORMING ACTIVATED CARBON BLOCK FILTER

Removes chlorine, turbidity, VOCs (volatile organic compounds), TTHM, and other health effect chemicals; reduces heavy metals, bad taste, and odour.

3

CORAL SAND FROM JAPAN

With 100% natural marine origin and sustainable production, this supplies natural calcium source, and slightly improves pH level of the drinking water.

4

PI-WATER CERAMIC BALLS FROM JAPAN

Suppresses oxidation and disintegration.

5

FAR INFRARED RAY BALLS (FIR)

Provide FIR rays and abundant minerals into drinking water, providing good taste and boosting body metabolism.

6

NEGATIVE IONS BALLS

Release high negative ions into drinking water to make it fresh and also give it a better taste.

7

ANTIBACTERIAL CARBON POWDER

Improves the absorption of bad taste, chlorine, odour, and other inorganic chemicals. Silver ions added to prevent the growth of bacteria inside the cartridge media and to keep it always fresh.

8

35+ ULTRATECH FIBRE MEMBRANE

Removes 99.9999% of coliform and E. coli; removes bacteria and reduces microscopic impurities. Removes 99.99% of viruses.

9

ANTIBACTERIAL SILVER-LITE STONE

Prevents bacteria growth inside the filter system and recontamination from the outside.

35+ ULTRATECH FILTER TECHNOLOGY

HomePure filters have always been **best-in-class for household** use because they use ultrafiltration (UF) as the primary method of filtration. This is made better in HomePure Nova, which now uses the new 35+ UltraTech Filter Technology.

WHAT ARE THE ADVANTAGES OF THIS NEW TECHNOLOGY?

Removes
99.9999%
of bacteria and
99.99%
of viruses

Destroys
microorganisms
300%
smaller than the width of
a human hair (0.2 microns)

Withstands higher
pressure (up to 4 bars)
and clogs less

Has
16%
higher filter capacity
than that of the
7-in-1 Filter Cartridge
(a lifespan of up
to 5,000 litres)

HOW DOES IT WORK?

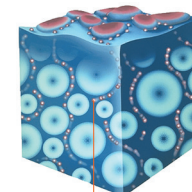

- **Mechanically** removes microorganisms with nominal pore size of 0.2 microns and above – that's up to 300% smaller than the width of a human hair.
- **Positive charges** coated on the surface of the UF membrane attract the negatively charged DNA of microorganisms in the water, enabling it to remove **99.9999% of bacteria and 99.99% of viruses**, the highest rate of removal for a water filter.

NEW ENHANCED FEATURES

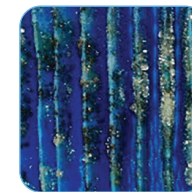

Microban® antibacterial technology is built-in to the water tank, head adapter, and LPDE hose inside the flexible pipe of HomePure Nova to help prevent the growth of bacteria, mould, and mildew.

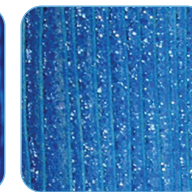

PRODUCT DEGRADATION

White dots = antimicrobial additives
