

# AirPure HUMIDIFIER

## **Combat dry air and reduce chances of infection.**

When the air in your home is dry, you may be prone to discomforts like dry skin, sinus congestion, dry throat, nose irritation, bloody nose, dry cough and cracked lips. This is especially the case during dry winter months or when an air conditioner is being used during the summer.

## **HOW CAN THE AIRPURE HUMIDIFIER HELP ME?**

The AirPure Humidifier adds moisture to the air in your home, reducing dryness that can cause irritation in many parts of the body. It also ensures clean and healthy air by minimising the concentration of dust, bacteria and other irritants through the regulation of moisture levels.

Besides the many health benefits of the AirPure Humidifier, it also offers benefits to your home. It can help reduce static electricity, help preserve a room's appearance by slowing the peeling of wallpaper or preventing cracks in paint and furniture, and hydrate the plant life of your home.

## **BENEFITS**

- Prevents dry skin.
- Reduces allergy symptoms.
- Helps prevent cold and flu.
- Eases asthma symptoms.
- Relieves sinusitis.
- Controls static electricity.

## **KEY FEATURES**

- Silver Cube protects the water from contamination.
- Amezcua Strip energises the air you breathe.
- LED lights.
- Operates quietly.
- Low energy consumption.

## **WHAT MAKES THE AIRPURE HUMIDIFIER UNIQUE?**

- It produces cool antibacterial mist.
- It is the only humidifier that produces energised mist.

## **WHO SHOULD USE THIS PRODUCT?**

People with breathing conditions like congestion, sinusitis and asthma; nosebleeds; skin conditions like dry and chapped skin.

The AirPure Humidifier can be used in homes and offices especially in rooms with wooden floors, containing musical instruments or store rooms. It can also be used in hospitals, museums and galleries.

## **FIRST TIME USE**

- Step 1** – Place the AirPure Humidifier on a flat, stable surface.
- Step 2** – Detach the water tank from the base and turn upside down so that the filter is now facing up.
- Step 3** – Unscrew the filter cartridge to access tank opening and fill not more than half the water tank with clean filtered water.
- Step 4** – Screw the filter back on tightly, making sure it is sealed and water-tight. Place the water tank back on the base after all components (Amezcua Strip and the Silver Cube) are in place.
- Step 5** – Connect the adaptor to the power input on the reverse side of the base and then connect to a power socket.
- Step 6** – Using the power button, switch on the AirPure Humidifier. The three LEDs will light up the water tank. The steam outlet can be turned 360°.

# USAGE GUIDELINE

## Suggested Applications

- Recommended to use in enclosed rooms.
- Place the humidifier in a ventilated environment – e.g. fan or air-conditioned room.

## Caution

- Always place on flat and level surface when using the device.
- Use with only clean and filtered water.
- Do not overfill.
- Use manufacturer-supplied power adapters only.

## FREQUENTLY ASKED QUESTION (FAQs)

### How does the AirPure Humidifier work?

A membrane vibrating at high frequency transforms the water into a very fine mist, which is then blown to the air through a ventilation system. This mist is slightly cold, so there is no risk of scalding. Ultrasonic humidifiers require very little electricity.

### How do I operate the AirPure Humidifier?

Please refer to the User Manual provided along with the product.

### When do the filters need to be replaced or changed?

It is recommended to change the filter cartridge, antibacterial Silver Cube and the Amezcua Strip every 4-6 months.

A replacement filter set consisting of the filter cartridge, antibacterial Silver Cube and the Amezcua Strip is available in the QNET eStore.

### Where can I get more information about the product?

- A. Contact your reseller.
- B. Contact our Global Support Centre at [global.support@qnet.net](mailto:global.support@qnet.net).
