

CERTIFICATE

At our Holistic Center we have analysed and tested the Amezcua E-Guard and summarise as follows:

1. The tested informed Amezcua E-Guard improves energy medical criteria such as energy, information, functional and sol-gel state. The results are statistically significant to highly significant.
2. An increase of energy can be noted when the Amezcua E-Guard is applied to the skin in the palm. In contact with the so-called thymus point (upper sternum) the informational effects are distinctively more clearly pronounced.
3. Conversations while holding the mobile phone to the ear (without the Amezcua E-Guard) reduce organ functions and cause gel tendency in the mesenchyme (viscosity increase in active connective tissue or rather of the matrix). Using the Amezcua E-Guard (*attached to the mobile phone*) these biological effects are not only neutralised, but even transformed into positive effects.
4. Due to the significance of the results in our studies we can attribute real positive biological-energetic-informational effects to the Amezcua E-Guard.

Prien,
